EDUCATION & TRAINING

09/09/2020 - 18/06/2026 - MADRID, SPAIN

B.SC. IN DATA ENGINEERING- UNIVERSIDAD POLITÉCNICA DE MADRID (UPM)

This degree covers data processing, programming, database management (relational, non-relational and distributed), Big Data technologies, cloud computing, and data acquisition and storage.

The programme includes mathematics, statistics, probability, optimization, signal processing, machine learning, data analysis and visualization, and decision-support techniques. It also develops skills in data architecture, data engineering applications, cybersecurity, data protection, and communication networks.

Additional training covers project management, business models, entrepreneurship, professional development, and ethical and legal frameworks. Practical experience includes engineering projects (including both traineeships at ArcelorMittal Global R&D South).

The final degree project focused on applying computer vision techniques to streamline and automate the characterization of steel micrographs.

Level in EQF: 6

WORK EXPERIENCE

17/03/2025 - 02/07/2025 - MADRID, SPAIN

RESEARCH ENGINEERARCELORMITTAL GLOBAL R&D SOUTH

DUring my first traineeship at ArcelorMittal, I developed a U-Net Convolutional Neural Network (CNN) to automatically detect and segment copper infiltration defects in steel micrographs, addressing a manual and time-consuming inspection task. I also designed and implemented image-processing and preprocessing workflows to support model development, evaluation and analysis of microscopy data.

01/10/2025 - 17/12/2025 - MADRID, SPAIN

RESEARCH ENGINEERARCELORMITTAL GLOBAL R&D SOUTH

During my second traineeship at ArcelorMittal, I extended the initial AI solution through feature engineering on detected defects, extracting quantitative characteristics to enable more detailed downstream analysis. I also developed a Gradio-based web application to visualize model outputs, inspect detected defects and download processed results in a structured format. In conclussion, I worked across the full solution lifecycle, from understanding the industrial problem and developing the AI model to analyze results and deliver a user-facing prototype.

20/12/2025 - CURRENT - MADRID, SPAIN

BOOKSHOP SPECIALISED SELLERLOS LIBROS SALVAJES

At Los Libros Salvajes, I focused primarily on modernization and digitalization initiatives, integrating new IT systems into the bookshop's daily operations. My responsibilities also included keeping up to date with new book releases and identifying ways to enhance the customer experience. Additionally, I managed relations with public administration bodies, including participation in public tenders for major book supply contracts. Other key responsibilities included managing the bookshop's social media presence and coordinating book clubs.

SKILLS

team-work in team | Time Management, Attentiveness, Problem solving, Effective communication skills | Proven ability to adapt to changes and multicultural environments, proven resilience | Having interpersonal communication skills | Demonstrated flexibility, adaptability and the ability to perform under challenging conditions | Microsoft Office: Word, Excel, Powerpoint, Outlook, OneNote | Python (computer programming) | MicroStrategy, PowerBI, Qlikview, Tableau | Kubernetes Basics

LANGUAGE SKILLS

Mother tongue(s): **SPANISH**

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C1	C1	C1	C1	C1
FRENCH	A2	A2	A2	A2	A2

Levels: A1 and A2: Basic user - B1 and B2: Independent user - C1 and C2: Proficient user
